Utmost Attention to Detail Creates High-End, Low-Maintenance Cedar Siding Solution

A natural cedar replacement for the hardboard market, Grayne Engineered Shake & Shingle incorporates every luxurious detail of cedar shingles. This enables Grayne to deliver all the warmth and ambience of real cedar, without the costly maintenance.

The 5" plain sawn shingle's sharply defined edges and grain patterns create realistic depth and shadows. As natural cedar ages, the light, thicker grain and dark, thinner grain have distinct color differences. To deliver this authentic multihued, aged cedar appearance, Grayne utilizes a proprietary coating process.

Another benefit of this process is that Grayne's unique palette, available in 6 popular colors, bypasses the 3 to 5 year natural cedar weathering process to deliver the perfect aged color from the day it's installed. In addition, its grain texture is visible from every angle. The deep keyways create pronounced shadows, which make a bold statement up close and from the curb.

An engineered composite, Grayne features a high-performance weather-resistant cap, which resists moisture absorption. Unlike cedar shingles, it will never cup, curl, crack or split and never needs painting. It can also easily replace or complement fiber cement or engineered wood siding.

Fast and easy to install, its cavity back design allows for airflow behind the panel, saving time and money versus installing on wooden laths. To deliver the most genuine look, Grayne's patent pending dual offset installation method enables the shingle siding to be easily installed in the same layout as natural cedar. This also prevents keyway stacks.

Extremely durable, Grayne holds a Class 1A Fire Rating, exceeds the 170MPH wind load rating and is certified by Florida Building Code and Texas Department of Insurance. It comes with a 50/5 year limited warranty (50 years against manufacturing defects, 5 years on labor).

For the upscale look without the maintenance worries, today's cedar shingle solution is Grayne.

Which color is right for you?

Cape Grey - A popular choice in East Coast saltbox homes, you can't go wrong with Cape Grey for a nautical look. On the other end of the scale, it's also a classic neutral shade, and can lend a look of sleek glamour to your home.

Ridge Moss - This green grey shade has a calming, tranquil feel for any home, especially those near water.

Autumn Shade - Brown subtly signifies security and stability. This light neutral is a relaxing, timeless choice for any home.

Aspen Brown - For a natural feel in tune with nature, brown is a solid choice. It also blends well with trees and other foliage.

Lakeside Blue - An ideal color for every style from Colonial to Queen Anne to Craftsman, Lakeside Blue can serve as a neutral with its gray tones. Pair it with bright shutters for a dramatic pop of color.

Homestead Red - This distinctive red warms up your home and makes a bold, yet welcoming statement to visitors. It helps homes stand out beautifully in a neighborhood.
